

1 GLOBAL SYSTEM WORKFLOW

This describes how data and user flows move across the platform.

Below is a **complete, developer-ready workflow + screen-flow** for the full exam platform described in your document ().

It is structured so your development team can directly implement front-end routes, navigation, states, and API integration.

I've broken it into:

- 1 Global System Workflow (High-Level Flow)
 - 2 Role-Based Workflows (Super Admin, Org Admin, Expert, Reviewer, Student)
 - 3 Screen Flow Diagrams (Textual + UI Mapping)
 - 4 Navigation Structure for Each Role
 - 5 Suggested Next.js Route Structure
-

1 ROLE-BASED WORKFLOWS

★ SUPER ADMIN WORKFLOW

Goal: Manage organizations, subscription plans, transactions, global content, system monitoring.

Workflow Steps

1. Login → SuperAdmin Dashboard
2. Navigate to *Organizations*
 - View list → Create → Approve/Reject → Change status
3. Navigate to *Subscription Plans*
 - Create → Update → Set prices/features
4. Open *Global Exams*
 - Add exam → subjects → topics
5. Global Question Repository
 - View → delete
6. Payments
 - View transactions, status, filters

7. Logs & Monitoring

- View system activity (from Logs table)

8. Notifications (trigger, broadcast)

9. Users

- Add Experts → Add Reviewers → Change status
-

ORGANIZATION ADMIN WORKFLOW

Goal: Manage students, staff, tests, certificates.

Workflow Steps

1. Login → Org Dashboard

2. Students

- Register → Import CSV → Assign groups

3. OrgUsers

- Add Experts → Add Reviewers → Change Status

4. Question Bank

- View Org Questions

5. Test Management

- Create, update, manage Test

6. Assign Test

- To whole organization
- or to specific student groups

7. Monitor Tests in Progress

- Live status → View tests analytics

8. Certificates

- Auto-generate → Download

9. Subscription

- Buy → View → Renew → Update
-

SUBJECT EXPERT WORKFLOW

Workflow Steps (For both Org and general) **Note: The AI is treated as a subject expert**

1. Login → Expert Dashboard
 2. Create Question
 - Select exam → subject → topic
 - Set difficulty → explanation → options
 - Submit for verification
 3. Edit Questions
 - Update AI-generated questions and own generated
 4. Review feedback from Reviewers
 5. Manage question quality score / metrics
-

REVIEWER WORKFLOW

Workflow Steps

1. Login → Reviewer Dashboard
 2. Review Pending Questions
 - Approve / Reject
 - Add reviewer comments
 3. Verify difficulty level
 4. Monitor expert performance (optional metric)
-

STUDENT WORKFLOW

Workflow Steps

1. Login → Student Dashboard
2. Attempt Test
 - Start → Timer begins
 - Navigate questions
 - Submit

3. View Results

- Question-wise analysis

4. Analytics

- Topic strengths/weaknesses
- Percentile, ranking
- Suggested topics for revision

5. Certificates

- Download Completion/Merit certificates

Addition to the above the individual student can perform the following as well:

6. Test Management

- Create, update, manage Test
-
